Where performance and technology merge together, creating the finest high quality innovative stretch fabrics for performance dancewear.
PURA - COTTON

Our new PURA Cotton range uses the highest quality natural Combed Cotton yarns. In conjunction with its smooth bio-polished surface that is created by using a unique environmentally friendly biodegradable enzyme, the Eclipse PURA Cotton range is at the forefront of quality, eco-friendly finishes, and innovation.

The Cotton yarn used has the added benefits of being combed, which gives our fabric a premium soft quality finish. The additional combing procedure teases away any impurities and short fibers before being spun into yarn, resulting in producing a high-quality fabric with excellent strength, softness and minimizes pilling. Cotton also naturally draws away heat to keep you cool, along with the benefits of moisture absorbency and breathability.

The smooth bio-polished surface of our PURA Cotton range is created by using a unique environmentally friendly biodegradable enzyme. The enzyme removes the protruding fibres on the fabric surface, significantly reducing pilling, softens the fabric and gives a sensational smooth appearance. As the enzyme is natural and not a chemical finish it is classed as Eco-Friendly and biodegradable.

FEATURES AND BENEFITS
- Eco-friendly
- Biodegradable
- Smooth surface
- Soft handle
- Premium quality
- Natural product
- Breathable
- Moisture absorbent
- Combed Cotton

PRODUCT SPECIFICATIONS

PURAS - HEAVY WEIGHT COTTON

Our new Heavy Weight PURA Cotton range uses the highest quality natural Combed Cotton yarns. In conjunction with its smooth bio-polished surface that is created by using a unique environmentally friendly biodegradable enzyme, the Eclipse PURA Cotton range is at the forefront of quality, eco-friendly finishes, and innovation.

The Cotton yarn used has the added benefits of being combed, which gives our fabric a premium soft quality finish. The additional combing procedure teases away any impurities and short fibers before being spun into yarn, resulting in producing a high-quality fabric with excellent strength, softness and minimizes pilling. Cotton also naturally draws away heat to keep you cool, along with the benefits of moisture absorbency and breathability. The higher elastane content and heavier weight also gives you a great supportive garment where required.

The smooth bio-polished surface of our PURA Cotton range is created by using a unique environmentally friendly biodegradable enzyme. The enzyme removes the protruding fibres on the fabric surface, significantly reducing pilling, softens the fabric and gives a sensational smooth appearance. As the enzyme is natural and not a chemical finish it is classed as Eco-Friendly and biodegradable.

PURU - BAMBOO

Our new PURA Bamboo range is made from Bamboo pulp, creating a sustainable yet durable natural fabric that is beautifully soft and pleasant to touch. PURA Bamboo also has many other great natural features such as moisture wicking, breathability, thermo regulating, anti-bacterial and deodorization properties, bringing the Eclipse PURA Bamboo range to the forefront of quality Sustainable and Bio-degradable fabrics.

Our Bamboo yarn is derived from this unique plants cellulose pulp, keeping the raw natural properties that make Bamboo so beneficial to wear. PURA Bamboo is also beautifully soft and has a sensational fashionable drape creating a fabric that is pleasant to the touch and envelops the skin giving the wearer a level of comfort and style.

The Bamboo pulps moisture wicking and thermo regulating properties make it comfortable to wear keeping you cool in summer and warm in winter. It also contains natural functions of anti-bacteria and deodorization properties whilst still being resilient, durable, and hyper allergenic for sensitive skin.

Bamboo is one of the fastest growing plants in the world that can replenish itself within one year. Very little Bamboo is irrigated making its water use highly efficient and environmentally friendly. It is naturally prolific and pest resistant which means it does not need fertilizers to boost its growth or pesticides to maintain its quality. It also absorbs more carbon dioxide and releases more oxygen from the air than any other timber giving you a much greener option.

FEATURES AND BENEFITS
- Sustainable
- Biodegradable
- Thermal regulating
- Anti-bacterial
- Resilient and durable
- Naturally moisture wicking
- Great moisture apportion
- Breathable
- Hyper allergenic
- Beautifully soft
- Pleasant to touch

Black
Based in Brisbane Australia, Eclipse Textiles is the leader in wholesale stretch fabrics with LYCRA® and Spandex fiber catering specifically for the Swimwear, Active Sports, Fashion, Dancewear and Intimate Apparel markets.

We are a textile wholesale company well known in the trade for:

- High quality stretch LYCRA® fabrics
- Market leaders in product diversity and innovation
- Extensive stocked product ranges
- Exceptional customer service

Established in 1987, Eclipse Textiles imports Italian premium quality LYCRA® fabrics, as well as many other products from countries including Brazil, Korea and China for distribution within our markets.

Acquired by Charles Parsons in 2014, Eclipse is now part of the family that has been at the forefront of the Australian Textiles Industry for 100 Years. Charles Parsons are a family owned business with unique values. We both believe in developing Trusted Innovative Partnerships that are tailored to the needs of our suppliers and customers. These values are as unique today as they were 100 Years ago when their business was first established in 1915.
Strengthened by over 50 years of experience in the textile industry, Carvico has, throughout its history, gradually consolidated and expanded its global reputation in the warp-knitted fabric sector.

Carvico stands out from the crowd for its active commitment to technological innovation processes, continually engaged in the research and application of avant-garde solutions that bring products of excellence and quality to the market and produce a level of customer service that is at the apex of the sector.

Innovative technology, quality without compromise and research into style: these are the key words that for over 30 years have been the hallmark of the identity and success of Jersey Lomellina SpA, international leaders in the circular knit fabrics industry.

Great attention is paid to every detail at all stages of the production process where meticulous checks and selective tests are carried out to ensure that the fabrics offered by the company are of the highest quality.
EUROJERSEY is well known at International level for the high-performing characteristics of its Sensitive® Fabrics. Behind their success lies an entrepreneurial spirit which combines innovation and constant attention to quality with the sustainable development of large-scale production.

Sensitive® Fabrics combine the unique qualities of inventiveness and Italian style. Their manufacturing methods, developed and patented by EUROJERSEY itself, allow for the creation of high quality coloured and printed fabrics using innovative techniques which enhance the creativity of the design.

Their fully integrated production plant is one of the most advanced in the world. State of the art machinery allows them to manage the entire process, from knitting to dyeing, finishing to printing. Thanks to the company’s experience and to their continued research they have perfected their Sensitive® Fabrics through an extremely efficient organization of production.
Our Product Diversity

Our high quality products are used across a variety of markets, some designed specifically, and some that can be used across all areas.

Swimwear:
Eclipse Textiles swimwear fabrics are selected with quality, innovation, technology and creative freedom in mind, to ensure we provide only the best selection for our customers.

Activewear:
The range of our active sports fabrics is based on advanced technology, performance benefits and comfort, giving you the highest quality fabric to work with.

Fashion:
Eclipse Textiles is engaging up-to-date fashion trends, contemporary styles and refined glamour to always present you with the most seasonable fabrics.

Dancewear:
The Eclipse dancewear fabrics reflect what you need most on stage: vibrancy, elegance, special themes, glamorous sheers and shine to make your performance a real extravaganza.

Intimate Apparel:
Care is taken when choosing the fabrics for our intimate apparel range. Aspects like perfect support, caressing softness and cosy comfort are considered in compiling a range that makes your garment feel sensational.
Quality Control

The Charles Parsons Laboratory which we have access to, based in Melbourne, is a highly diversified textile testing laboratory with accreditation approval from LRQA for AS/NZS ISO 9001:2008. By continually updating their equipment and processes, as well as maintaining the most stringent and uncompromising standards, they provide services not only to our own Charles Parsons businesses but also to the textile industry at large.

In conjunction with our European suppliers commitment to customers is proved by the meticulous checks that accompany each stage of the manufacturing process: every single aspect of the production process, from raw materials (fibres, yarns, and dyes) to finished fabrics, is rigorously inspected by highly-qualified staff using cutting-edge assessment tools.

Continuous and significant investment in this field means that all fabrics produced comply with strict production specifications, enabling the group to guarantee that only top quality reaches the market.

At Eclipse Textiles we stand by our products with the confidence our Laboratory delivers, so that our customers in turn benefit from safe, performance assured textiles.
Product Development

Our product development team continuously monitors industry developments in the international market to provide our customers with the latest textile and yarn trends, innovative print designs and seasonal colour schemes.

Eclipse ensure key staff are on the ground at the most prestigious trade fairs, either researching new product trends, or displaying our quality products alongside our European Alliances.

Our design team also offers a personalized service for our customers arranging individual print styles and colour requests, custom dye batches as well as multiple print programs including direct digital, sublimation and screen.

Due to our on the pulse research and working hand in hand with our suppliers, we have an extensive sourcing library accessible to our customers for specific batch requests. This gives our customers the opportunity to incorporate something truly unique into their range.
Customer Service

Eclipse is proud to have a customer ownership program in place, where each customer is allocated their own dedicated customer service rep to assist them in all aspects of ordering, product information, freight enquiries and additional information they may require.

Dealing with the same people on a daily or weekly basis has help us build strong relationship and understand what it is our customers do and how we can best assist each of them individually. We have many long standing customers who prefer to deal with our team due to the personalized service we offer.

Our customers are always kept up to date through our internal coding programme which allows them to be automatically sent any new samples or important email notifications relevant to their market. Keeping our customers in touch with the industry is something we pride ourselves in.
