Where performance and technology merge, creating the finest high quality innovative stretch fabrics available for the Active sports market.
SUSTAINABLE VITA XTRA LIFE LYCRA®

New sustainable Carvico techno-fabric made with Econyl® - 100% regenerated nylon and polyester fiber from post-consumer materials. Due to the latest yarn and knitting technologies, it is 20% flatter than your normal Matt Nylon Lycra®, even though it still has the same power and coverage. The fabric's flat surface is the perfect platform to apply your own sublimation print, creating a magnificent crisp, clean finish.

VITA also has 4 times more fabric compression power capacity than competitors fabric with other elastane, which is essential for the active sports industry.

The colours marked as polyester have been manufactured using a polyester fiber to achieve the highest colour fastness values technically possible for these colours.

FEATURES AND BENEFITS

- Sustainable
- Smooth and soft
- 20% flatter
- Compression power
- Shape retention
- Maximum durability
- UPF 50+ sun protection
- Extra strength
- Outstanding quality
- Premium quality Carvico product
- Branded Xtra Life Lycra®

SENSITIVE LYCRA® FABRICS

ACTIVE

Sensitive is a coordinated system of versatile, high-performing fabrics. Thanks to its patented knit structure, it gives you characteristics which add value to garments by raising their performance and aesthetic qualities.

The Sensitive fabric system is unequalled for the versatility with which it is possible to create extremely high-performing garments for water sports as well as complete ranges of coordinating Active wear, from high performance wear to accessories.

The most technologically advanced solution for Active wear, which guarantees the highest quality, durability, comfortability and protection from UV rays.

SENSITIVE FEATURES AND BENEFITS

Super Comfortable:
All garments created with Sensitive fabrics are more comfortable and pleasant to wear.

Extraordinarily Soft to the Touch:
Sensitive allows you to create garments that fit like a second skin.

Ultra Fine and Extremely Light:
The much reduced thickness of Sensitive allows for the creation of garments that guarantee exceptional wear ability and elegance without losing elasticity or shape.

Perfectly Uniform:
The smooth, homogeneous surface gives a particular brightness the fabric and brilliance to the colours.

Breathable:
The open knit of the fabric ensures breath ability and therefore is better for the body.

Absolutely Easy Care:
Sensitive has characteristics which make it very practical and resistant to washing, keeping its colour and shape intact.
**SENSITIVE CLASSIC Lycra®**

The original Sensitive fabric is a perfect mix of microfiber with 28% Lycra® fiber which guarantees the best aesthetic and functional characteristics.

Discover all of the incomparable performance features the Sensitive Classic fabric entails which includes: extra comfort, body moisture wicking, quick drying, sun blocking, extra fine, chlorine resistance, no pilling, easy care and wrinkle free.

**PRODUCT SPECIFICATIONS**

- Code: BFAQ 036 Black
- Composition: 72% Microfiber Nylon 28% Lycra®
- Weight: 164gsm +/-6%
- Width: 140cm +/-2%

**SENSITIVE FIT Lycra®**

Mesmerizing style for optimum control of the silhouette. Assuring extra performances, comfort and flawless wear ability.

Figures become refined and slender, because it reshapes and models lines and profiles. Sensitive FIT is efficacious and highly versatile, ideal to enhance every form and feature.

**PRODUCT SPECIFICATIONS**

- Code: NNAQ 036 Black
- Composition: 68% Microfiber Nylon 32% Lycra®
- Weight: 213gsm +/-6%
- Width: 150cm +/-2%
SENSITIVE BONDED Lycra®

Created using a special technique which unites two strands of Sensitive Classic fabric melding them together, they are perfect for heavier or more constructed garments.

The Bonded version is also useful for the manufacture of shoulder straps and reinforcements.

CARVICO XTRA LIFE Lycra® Fabrics

Active

A technologically advanced classic Matt Xtra Life Lycra® range, with the perfect balance between lightness and elasticity. Carvico Matt fabrics have been awarded the prestigious Xtra Life Lycra® certificate thanks to their unprecedented array of outstanding features. They are chlorine and abrasion resistant, UPF 50+, and remain unaltered over time.

All fabrics are of the highest quality standard, durable, comfortable to wear and have great stretch and recovery. They also contain different levels of fabric compression power due to the Xtra Life Lycra® content, which is essential for the active sports industry.

Garments made with Xtra Life Lycra® Fiber can stretch, but more importantly they have excellent recovery performance so that garments can keep their shape. Designers around the world are using Xtra Life Lycra® Fiber, allowing people to wear stylish supportive garments that last.

Carvico Features and Benefits

Perfect Fit:
The extreme elasticity of the fabrics enhances its shaping power and comfort, and guarantees maximum freedom of movement to the user.

Shape Retention:
The high modulus translates in the perfect degree of muscular compression and support, while its recovery power allows the fabrics to follow your every movement ensuring a perfect fit under any circumstances.

Ultra Chlorine Resistant:
Xtra Life Lycra® Fiber resists fabric breakdown more than 5 times longer than your average chlorine-resistant spandex.

Excellent Coverage:
The advanced knitting technology and construction makes the fabrics compact and dense, creating great coverage.

Excellent UV Protection:
The tight knit also works as a filter against the sun’s harmful rays, ensuring a UPF 50+ protection factor.
ATLANTA PLUS XTRA LIFE LYCRA®

Atlanta Plus, the high performance fabric par excellence, offers the perfect muscular compression, it decreases muscular vibrations and strain and improves athletic performance.

It is therefore ideal for sportswear, even the most extreme. It is resistant to pilling, abrasions, chlorine, sun creams and oils and ensures the best fit over time.

PRODUCT SPECIFICATIONS
Composition: 80% Nylon 20% Xtra Life LYCRA®

Breathable Fabrics

Where freedom of movement and comfort merge, creating a range of high quality, breathable stretch fabrics for the sports industry.
**SUPPLEX® LYCRA®**

A specialised INVISTA yarn which has the benefits of Nylon with a superior Cotton handle. Supplex® is a jet air textured Nylon that gives the fabric a feeling of natural Cotton, while still giving you the performance benefits of Nylon. It is breathable, faster drying than cotton, crease resistant, anti-pilling and durable, making it perfectly suited to the Active sports market.

Garments made with LYCRA® Fiber can stretch, but more importantly they have excellent recovery performance so that garments can keep their shape. Designers around the world are using Xtra Life LYCRA® Fiber, allowing people to wear stylish supportive garments that last.

**PRODUCT SPECIFICATIONS:**

Composition:
92% Supplex®, 8% LYCRA®

Weight:
240gsm +/- 5%

Width:
150cm +/- 5%

- Fully breathable
- Faster drying than cotton
- High colourfastness values
- Exceptionally soft handle

SPACE-DYED SUPPLEX® LYCRA®

High quality SUPPLEX® LYCRA® stocked in a rainbow of space dyed colours. The fabric entails a superior natural Cotton handle due to the use of jet air textured Nylon yarn.

Features like breathability and fast drying features, makes our space dyed SUPPLEX® range the ideal choice to make your sports garment stand out from the rest.

PRODUCT SPECIFICATIONS
Composition: 91% Supplex®, 9% LYCRA®
Weight: 230gsm +/- 5%
Width: 157cm +/- 5%

SUPPLEX® LYCRA® HEAVY WEIGHT

High quality Supplex® LYCRA® stocked in black only. Superior natural Cotton handle due to the use of jet air textured Nylon yarn. Features like breathability and faster drying than Cotton, make Supplex® the ideal choice for a supportive active sports garment.

Combined with the higher LYCRA® content, the heavier weight gives you support, and shape and retention which is an essential requirement for the sports industry.

PRODUCT SPECIFICATIONS
Composition: 86% Supplex®, 14% LYCRA®
Weight: 280gsm +/- 5%
Width: 150cm +/- 2%
SUPPLEX® LYCRA® FRENCH TERRY

Supplex® French Terry is breathable, faster drying than Cotton, crease resistant, anti-pilling and durable. It also has the added benefits of feeling like natural Cotton due to the jet air textured Nylon yarn which is used.

Using the Supplex® in a French Terry knit construction provides an exceptionally plush and warm fabric perfect for high end track pants or jackets.

PRODUCT SPECIFICATIONS
Composition: 93% Supplex®, 7% LYCRA®
Weight: 270gsm +/- 5%
Width: 145cm +/- 5%

SUPPLEX® LYCRA® PLUSH

Using the Supplex® in a brushed French Terry knit construction provides an exceptionally plush and warm fabric perfect for high end track pants or jackets.

Also, with the benefits of Invista’s LYCRA® product, it holds shape and retention which is an essential requirement for the sports industry.

PRODUCT SPECIFICATIONS
Composition: 92% Supplex®, 8% LYCRA®
Weight: 230gsm +/- 5%
Width: 140cm +/- 5%
COMBED COTTON LYCRA®

Our premium Combed Cotton LYCRA® range boasts an array of fresh rainbow colours, forecasted and researched to suit the active sports and dancewear markets.

Cotton, being a natural cellulose fibre, is perfect for the Australian market with our hot climate and outdoor lifestyles. Eclipse Textiles’ cotton has the added benefit of also being combed, which gives our fabric a premium finish. This process involves taking out the shortest additional fibres of a batch, resulting in a high-quality fabric with excellent strength and softness.

Also, with the benefits of Invista’s LYCRA® product, it holds shape and retention to support an active lifestyle.

FEATURES AND BENEFITS

- Premium quality
- Extra softness
- Extra strength
- Breathable
- Moisture absorbent
- Natural product
- Durable
- Great fit and comfort
- Branded LYCRA®

PRODUCT SPECIFICATIONS

Composition:
92% Combed Cotton, 8% LYCRA®

Weight:
220gsm +/- 5%

Width:
150cm +/- 5%
HEAVY WEIGHT COMBED COTTON LYCRA®

Our heavy weight Combed Cotton LYCRA® is a high-quality fabric with excellent strength and softness. Also, with the benefits of Invista’s LYCRA® product, its high content allows for extra shape hold and retention, giving you support and freedom of movement.

POLY/COTTON LYCRA®

Eclipse Textiles’ premium Poly/Cotton LYCRA® fabric is specifically designed to suit the active sports and dance markets. The perfect balance of Polyester and Cotton allows another choice for the sportswear market by combining the benefits of both yarns.

The Polyester content allows this blend to be harder wearing than Cotton, assisting in the reduction of pilling, whilst still having a touch of softness, breathability and the natural feel of Cotton. Also, with the benefits of Invista’s LYCRA® product, it holds shape and retention.
Polyester Sublimation Bases

Where a range of fabrics come together giving you a blank canvas to create your own outstanding dynamic, sublimated printed finish with no yellowing and minimal shrinkage.
SUBLIMATION BASES

Even though all of these fabrics are polyester based, each one is unique in regards to its knit construction, yarn performance, and fabric behaviour in general. They are designed specifically for targeted end use, are of the highest quality standard, and all of them create an outstanding dynamic, crisp, clean printed finish with no yellowing and minimal shrinkage.

VITA POLYESTER XTRA LIFE LYCRA® SUBLIMATION BASE

New sustainable Carvico techno-fabric made with Econyl® - 100% regenerated polyester fiber from post-consumer materials. Thanks to its new unique knitting technology, its soft and smooth surface meets the highest quality standards for sublimation print technology. The fabrics flat surface is the perfect platform to apply your own sublimation print, creating a magnificent crisp, clean finish.

PRODUCT SPECIFICATIONS

Composition: 78% Polyester 22% Xtra Life LYCRA®
Weight: 190gsm +/-5%
Width: 150cm +/-2%

MATT POLYESTER XTRA LIFE LYCRA® SUBLIMATION BASE

Carvico’s Matt Polyester Xtra Life LYCRA® fabric meets the highest quality standards for sublimation technology. The benefits of Invista’s Xtra Life LYCRA® yarn technology, combined with the natural benefits of Polyester, make this product the perfect choice for a sport or swim sublimation base. The hard wearing, quick drying and maximum durability of Polyester, combined with Invista’s LYCRA® quality, creates a crisp matt printed finish, whilst still holding its shape and retention.

PRODUCT SPECIFICATIONS

Composition: 82% Polyester 18% Xtra Life LYCRA®
Weight: 190gsm +/-5%
Width: 150cm +/-2%
**BRIGHT POLYESTER XTRA LIFE Lycra® SUBLIMATION BASE**

Carvico’s Bright Polyester Xtra Life Lycra® yarn technology offers greater chlorine resistance, wearability and shape retention than fabrics made with ordinary Elastane. Combined with the natural benefits of Polyester, this sublimation base is hard wearing, quick drying and has maximum durability. Creating a bright crisp printed finish, whilst still holding its shape and retention, this fabric meets the highest quality standards for sublimation technology.

**PRODUCT SPECIFICATIONS**
- Composition: 80% Polyester 20% Xtra Life Lycra®
- Weight: 200gsm +/-5%
- Width: 150cm +/-2%

**SUBLI-SPORT XTRA LIFE Lycra® SUBLIMATION BASE**

Subli-Sport Polyester is a warp knit nontransparent fabric containing ceramic core technology. The Polyester yarn contains ceramic within the central core of its filaments. This technology prevents the “see-through” effect, in turn creating a UV blocking fabric. Due to the yarn construction, it also creates a cooling effect by reflecting the heat rays, thus keeping the wearer cool and refreshed. Subli-Sport is the perfect solution for sublimation printing when working with large white areas due to the non-transparent effect it creates.

**PRODUCT SPECIFICATIONS**
- Composition: 82% Polyester 18% Xtra Life Lycra®
- Weight: 230gsm +/-5%
- Width: 150cm +/-2%

**SUBLI-POWER Lycra® SUBLIMATION BASE**

Subli-Power Polyester is a powerful yet light weight warp knit fabric with a high Lycra® content, designed specifically to assist in compression and muscle oscillation when used in a sportswear garment. Due to the fabrics tight knit construction, Subli-Power is also non-curling, which gives you the opportunity to create raw edge garments. The fabrics flat surface is the perfect platform to apply your own sublimation print, creating a crisp, clean finish.

**PRODUCT SPECIFICATIONS**
- Composition: 75% Polyester 25% Xtra Life Lycra®
- Weight: 200gsm +/-5%
- Width: 150cm +/-2%
ELITE DOUBLE FACED XTRA LIFE Lycra® SUBLIMATION BASE

Designed for enhancing the effect of sublimation printing, Elite is an advanced double faced fabric, which allows for printing to be applied to both sides, giving you a new realm of garment design opportunities to explore. The fabric features also include being extra-white and super-matt and is the high performance techno-fabric for extreme sports. Certified Xtra Life Lycra® features outstanding power and is resistant to chlorine, sun creams and oils, pilling and abrasions.

PRODUCT SPECIFICATIONS
Composition:
70% Polyester 30% Xtra Life Lycra®
Weight: 210gsm +/-5%
Width: 150cm +/-2%

OLYMPIC POLYESTER LYCRA® SUBLIMATION BASE

Jersey Lomellina's Polyester Lycra® fine gauge circular knit fabric offers a smooth second skin sublimation base with unique performance benefits. Olympic is soft and comfortable, yet strong enough to assist in muscle control; it is a quick drying, hard wearing, ultra flat Polyester, with the perfect fit of Invista's Lycra® technology. Olympic is a high quality print base with minimum grin-through due to the fine gauge knit.

PRODUCT SPECIFICATIONS
Composition:
83% Polyester 17% Lycra®
Weight: 195gsm +/-5%
Width: 160cm +/-2%

CRETA POLYESTER LYCRA® SUBLIMATION BASE

Jersey Lomellina extremely light, very fine elasticised circular knit jersey fabric ideal for sublimation printing, Creta ensures an optimal yield from all printed colours. Breathable, fresh, soft and quick-drying, it ensures a perfect fit due to the high quality performance features of Lycra®. Creta is the ideal fabric for the creation of casual leisure wear, as well as youthful swim wear, intimate apparel and active sportswear in general.

PRODUCT SPECIFICATIONS
Composition:
82% Polyester 18% Lycra®
Weight: 145gsm +/-5%
Width: 155cm +/-2%
Subli-swift is a naturally quick drying light weight stretch woven Polyester, designed specifically for the application of run shorts, board shorts, or any garment that could benefit from the unique characteristics this fabric offers. The polyester content combined with the tight woven construction creates an outstanding crisp printed finish. Due to the fabric's performance features of quick drying, and light weight construction, Subli-swift is the perfect lightweight sublimation base for the sportswear industry.

PRODUCT SPECIFICATIONS:

Composition:
92% Polyester 8% Elastane
Weight: 160gsm +/- 5%
Width: 145cm +/- 2%

CUSTOM PRINT SERVICES

Combining the latest print technology, high quality inks and exceptional service, Eclipse Textiles can also supply your own unique print.

We can offer you the latest technology in direct digital printing, traditional screen print services, or supply you with one of our high quality base cloths for your own local sublimation printer.

Either of these printing processes can be applied to a variety of our high quality performance base cloths.
Complimenting Fabrics

Where the final touches are found to complete your new look.
